

WILSON GOMEZ

Fort Myers, FL | github.com/wilsong1230 | wilson@wilson-gomez.com | wilson-gomez.com

Software engineer student specializing in embedded systems, and full-stack applications. Passionate about aviation and hardware-software integration. Deeply proficient with modern AI tools—use LLMs daily for design, debugging, and rapid iteration. Seeking meaningful freelance projects and technical collaborations that solve real problems.

PROJECTS

Vehicle Detection & Analytics Dashboard | Python, FastAPI, React, YOLOv8

Full-stack pipeline: YOLOv8 detection + ByteTrack tracking → FastAPI backend → React dashboard. 30+ fps, 95%+ accuracy.

Autonomous Maze Rover | C, Arduino

State machine-controlled robot with proportional wall-following, servo ultrasonic sensor, real-time motor control.

PDF Control Point Extractor | Python

Desktop tool automating data extraction from civil engineering plans for surveyors & contractors.

SKILLS

Languages: C++, Python, JavaScript, TypeScript, Java, C

Full-Stack: React, FastAPI, SQLite, Node.js, Tailwind

ML/CV: YOLOv8, OpenCV, PyTorch

Embedded: Arduino, Real-Time Systems

Tools: Git, GitHub, Linux, Docker

EDUCATION

B.S. Software Engineering | FGCU | May 2027
